

2009 ACFL Summer Art Camp Class Descriptions

Alphabetical by Teacher

Brink – ***Draw, Paint, Print*** – Using methods described in “Drawing on the Right Side of the Brain” and other innovative approaches to draw and paint from pictures, from life and from the imagination.

Brink – ***Playing with Mud Part 1*** – This is a 2-part class – you must register for both Part 1 and Part 2 in order to take the class. There will be a one week break between sessions to allow the clay to dry and be fired. This class is about hand building in clay. We will make fantastical garden creatures, a bird house and animal bank and more. (limit 10 students)

Brink – ***Playing with Mud Part 2*** – You must have registered in Part 1 to take Part 2. You will glaze and fire the pieces created in Part 1. We will also do a few addition non-fire clay projects, if time allows (limit 10 students)

Brink – ***Build It – Creating with Wood and Other Materials*** – Create fabulous and fanciful structures and sculptures using wood and other materials. Stretch your imagination and your engineering skills – just build it!

Brink – ***Papercraft*** – Learn papermaking, paper marbling, paper folding, decoupage and other paper craft – from pulp paper hats – have fun with paper!

Brink – ***Metal Madness*** – Learn metal – stamping, metal embossing, wire creations and more! Work with tools, have fun, make fun projects. (limit 10 students)

Fiskus – ***Drawing from the Animal World*** – Understand the different shapes and forms of the animal kingdom and how to draw them using a variety of media both wet and dry.

Fiskus – ***Tie Dye*** – Create beautiful colored fabrics. Learn different folding and tying techniques. Complete four to five paper projects and two to three cloth projects.

Fiskus- ***Watercolor*** – Students will learn to color mixing and develop their skill with the brush. Focus on composition, shape, texture and line. We will explore different subjects.

Fiskus – ***Drawing from Nature*** – Understand the organic shapes found in the natural world and learn to draw them using both wet and dry media. Including some experimental techniques.

Fiskus – ***Fine Art Printmaking*** – Students will develop personal expression and learn carving and printmaking techniques using soft linoleum blocks and styrofoam blocks. We will learn about shape, line, texture and composition.

Hahn – ***Colored Clay, Glazes, Fabric, Print*** – This course will offer a wide variety of activities.

Intrator – ***For the Love of Rabbits*** - Students will make and paint a papier mache jackalope, create a sock stuffed bunny with clothes, learn counter cross stitch with Peter Rabbit Design and construct a welcome sign with craft foam using a rabbit design.

Intrator – ***Multi-Cultural Art*** – Students will explore art in various media from different cultures from around the world.

LaVie – ***Outdoor Landscape Sketching*** – The class will help young artists to the fundamentals of sketching outdoors. Students will work with pencils, charcoal, graphite and conte crayon. Will go outdoors and draw from the landscape around the Art Center.

LaVie – ***Art Safari in Mixed Media*** – In this class young artists are in search of birds and animals in order to discover ideas for creative projects in mixed media. Watercolor, pastels and colored pencils will be the media used.

Moss – ***Beading*** – Learn how to bead. This class is excellent for both boys and girls.

Moss – ***Creative Constructions*** – We will build and create objects with a variety of materials: boxes, sculpture, life forms, etc.

Yarrington – ***Beginning Watercolor*** – Learn to paint in watercolor.

Yarrington – ***Advanced Watercolor*** – Students must have some experience working in watercolor already by taking the Beginning Watercolor class or have done watercolor somewhere else.

Zeiger – ***Modern Fossils*** – Make impressions of natural and manufactured objects in clay, cast them in plaster and color them to look ancient. You can wear them, hang them up or keep them on a shelf or table.

Zeiger – ***Egyptian and Mayan Amulets*** – View and discuss photographic slides of Egyptian and Mayan art, then learn to make your own amulets using plastilene clay as a mold, casting in plaster and coloring it to look ancient. Wear them, hang them up or sue them as paperweights.

Zeiger - ***Building Buildings*** – Learn about architecture from the different cultures, past and present by viewing and discussing photographic slides of buildings and then constructing your own buildings with clay using what you've learned.

Zeiger – ***Abstract Geometric Constructions*** – Explore 3-dimensional geometry and play with concepts of balance, transformation, expansion and acceleration using craft sticks and glue.

Zeiger – ***Discovering Animals*** – Explore the animal kingdoms and animal anatomy using your imagination with re-cycled materials.

Zeiger – ***Great Architecture of the World*** – Learn about architectural styles and construction methods from many cultures past and present. Use your imagination to create your own versions with recycled materials.
